Products supplied on the markings or accompanying other printed documents according to the standards of the declared value obtained in the laboratory values. These values may vary depending on operational and environmental conditions of the product.

ASSEMBL

- 1 Device for mounting holes and the distance from the mouth to the device according to the product structure of the flange.
- 2 Put the device with insulating material between two product.
- 3 Instal the product with the help of assembly equipments as nut and bolt .
- 4 As shown in Figure 4 is equivalent to the product channel, connect the mouth area.
- 5 Connect the power cord, make sure that the correct wiring diagram looking. Device mounted on an all-pole circuit breaker, connect the splitter.
- 6 Be sure to install the product according to right air direction.
- 7 Perform a trial run for fan, check whether vibration and error of the product.

CONNECTION / SINGLE-PHASE CONNECTION

- Products should be installed only by authorized persons.
- Fans should be mounted outside the window or wall .
- If exposed inputs and outputs of products , with an aperture should be avoided by closing the entry of foreign substances
- Open the gas pipe or other fuel -burning devices inside of the room to avoid the reflux of gas is necessary to take pre- measures .
It is recommended that gloves be worn in the assembly of products .
- Before connecting the power cords from electrical definitely cut .
- When mounting Bracket all connections are made correctly and mounts strength to carry the weight of the product , make sure that you have .
- Even if the product off the main power supply is switched off when connecting apparatus make sure that .
- Before mounting the electrical connection indicated on the product information (voltage, power , frequency, etc.) Will be installed that are in keeping with the note Mahal.
- Airflow must not have any obstacles on the way .
- In terms of safety ground terminal located on the terminal must be connected to earth certainly building .
- Motor thermal overload relay and make sure it is connected properly .
- Product wiring , electrical connections must be as in the diagram .
- Contact separation in all poles along with a switch that must be connected to fixed wiring installations in accordance with the rules

USAGE

BDRS series radial centrifugal fans in generally offer perfect solutions for industrial and commercial applications for local cooling and heating systems. In mechanical refrigeration, boilers solid fuel, or air conditioning, the DC motor cooling, plastic machines, hosiery machines, the cooling of the electrical panel, laboratories, in residential and commercial spaces. are used. Compact structure they provide substantial space savings for a wide variety of air conditioning and refrigeration applications. The fan by providing more sound absorption aluminum body allows for the use of more sensitive applications.

Users before using the type of roof ventilators are obliged to read carefully the operating and maintenance manual.

Expected life of the products is **10** years.

When using your product for the first time;

- Before connecting electric cables, you must not forget to cut the power supply. Be sure that electrical connections of the product are established correctly and safely.
- Be sure that safety equipment is connected correctly.
- Properly establish earthing connections.
- Be sure that the cable and electric connection box are closed correctly and do not admit water leakage.
- Air exit direction should be in the direction indicated with the label on the body. There shall not be any obstacles in the air flow route.
- The wings should rotate in the correct direction.
- While the product is operating, there shall not be any vibration or internal rubbing or hitting voice due to the rotation of the fan or the suction fan.
- Power supply, current and frequency values shall comply with the product label.
- If any electricity warning device turns on, electric connection should immediately be cut from the main power supply. Before starting the product, all the installation should be controlled again carefully.
- If any problem occurs, please consult authorized persons.

In case of any defect after you have started using the product continuously, the type of defect should be determined. In order to remove the defect, the **technical service must be contacted. You must not try to fix the problem yourself.**

DEFECTS AND HOW TO FIX THEM

ABNORMAL SITUATION	POSSIBLE CAUSE	HOW TO FIX
TOO MUCH SOUND (NOISE)	ROTOR IMBALANCE	CHANGE THE ROTOR
THE DEVICE IS NOT WORKING	MOTOR IS DAMAGED	CHANGE THE MOTOR
	CONDENSATOR IS NOT WORKING	CHANGE THE CONDENSATOR
	FAULTY SPEED ADJUSTMENT CONNECTION	CHECK THE INSTALLATION (ASSEMBLY)
THE DEVICE IS ROTATING SLOWLY	FAULTY CONNECTION	CHECK THE ELECTRICAL CONNECTION

CLEANING, MAINTENANCE and TRANSPORT

In order to protect your product from being damage during transport;

- The product has been packaged according to normal transport conditions. In order to avoid possible damage, it should always be carried in its original package.
- The product shall be kept in its own package in a vibration-free, dust-free environment away from abrasive or chemical material until it is delivered to its place of assembly. Do not accept the products which are not in their original package or which were opened before being delivered to you.
- The products should be stocked into the vehicle in a way to stay motionless in case of any turn over or fall down.
- While heavy products are being carried, use appropriate lifters to protect products or the people carrying the products.
- All necessary measures should be taken in order to prevent damages arising from sudden and careless lifting and putting down.

USER'S MANUAL & CERTIFICATE OF WARRANTY

- The products should be carried one by one carefully. They shall not be thrown or carried carelessly from hand to hand.

Aftertaking the product out of its package;

- The delivered product should be checked.
- The product must be checked for damage during transport. If there is any lost or damaged part, it should immediately be informed to the transporter or our firm verbally or by writing.
- Do not hold the product on its connection box or electric cables. Abstain from applications which will damage the wings or the protective cage while carrying.

Periodic cleaning and maintenance of the product;

- Before cleaning or maintenance, even if the product is turned off, be sure that electric connection has been cut from the main power supply.
- All electrical equipment should be regularly controlled, connections should be checked and damaged or worn-out cables and equipment should be replaced.
- Periodic maintenance should be carried out at least once every six months or more frequently, depending on its frequency of use. Maintenance and cleaning of the product should be carried out by qualified staff.
- Check the product regularly. In order to prevent dirt or accumulations in the wing, motor or grill, carry out the maintenance according to the operating conditions of the product. Otherwise, the expected life of your product can be substantially shortened or serious damage can occur.
- While cleaning the product, pay attention to protecting the balance on the wing and the turbine.
- Bolts which might become loose during maintenance should be checked.
- Inappropriate parts should be immediately replaced.
- The product should not be cleaned with inflammable or combustible cleaners; it should be cleaned with a wet cloth. The product should in no way be exposed to water or pressure water.

WARRANTY and SERVICE

Dear customer,

We believe that providing good service is as important as providing good products for you. You can contact our Sales Representatives by calling us or obtain the most suitable service for you by contacting our Authorized Dealers.

We recommend you to follow the advices below.

1. When you buy a product, have your Authorized Dealer approve the Warranty Deed
2. Use your product according to the user's manual.

The warranty provided by BVN does not cover the damages arising out of using the product under conditions other than its normal conditions of use. The following conditions are also not included in the warranty:

1. Damages and defects arising out of faulty usage,
2. Damages and defects which occur while loading, unloading or carrying the product after it has been delivered,
3. Damages and defects arising due to low or high voltage, faulty electrical installation and using the product at a different voltage than the one written on its label,
4. Damages and defects due to fire, earthquake, lightning strike, etc.
5. Damages occurring due to using the product under conditions not conforming to the issues stated in the user's manual.

The above-mentioned damages are fixed on payment. Assembly and transport of the product is not included in the product price.

The responsibility of approving the warranty deed and submitting it to the customer belongs to the seller, dealer, agency or representative from which the customer has purchased the product.

Since the invoice will be taken as reference if a misunderstanding occurs about the warranty period, the user must keep the invoice and a copy of it together with the Warranty Deed.

If the warranty deed is altered, the original serial number on the product is removed or altered; the warranty deed will become invalid.
